

Python MySQL Create Database

[< Previous](#)[Next >](#)

Creating a Database

To create a database in MySQL, use the "CREATE DATABASE" statement:

Example

create a database named "mydatabase":

```
import mysql.connector

mydb = mysql.connector.connect(
    host="localhost",
    user="yourusername",
    passwd="yourpassword"
)

mycursor = mydb.cursor()

mycursor.execute("CREATE DATABASE mydatabase")
```

[Run example >>](#)

If the above code was executed with no errors, you have successfully created a database.

Check if Database Exists

HTML

CSS

MORE ▼

Example

Return a list of your system's databases:

```
import mysql.connector

mydb = mysql.connector.connect(
    host="localhost",
    user="yourusername",
    passwd="yourpassword"
)

mycursor = mydb.cursor()

mycursor.execute("SHOW DATABASES")

for x in mycursor:
    print(x)
```

[Run example »](#)

Or you can try to access the database when making the connection:

Example

Try connecting to the database "mydatabase":

```
import mysql.connector

mydb = mysql.connector.connect(
    host="localhost",
    user="yourusername",
    passwd="yourpassword",
    database="mydatabase"
)
```
